MY CHOICE: ILLINOIS TECH

We asked some current students why they chose Illinois Tech. Here’s what they told us. No filter, unedited, uncut.
SOME SCHOOLS MAY GET A LOT OF ATTENTION. BUT AT MANY OF THEM IT’S EASY TO GET LOST IN THE CROWD. ILLINOIS TECH IS SMALL BUT MIGHTY. WE ARE SMART, CREATIVE, PROBLEM SOLVERS. PEOPLE WHO GET THINGS DONE.

LIKE WHEN ILLINOIS TECH ALUMNUS MARTY COOPER INVENTED THE CELL PHONE.

AND WHEN 2015 GRAD DANE CHRISTIANSON BUILT HIS X-CUBE PUZZLE IN OUR IDEA SHOP AND GOTT 1.6 MILLION VIEWS ON YOUTUBE (IN ITS FIRST MONTH).

AND WHEN CURRENT STUDENT ALYSSA BOWES HELPED CONSTRUCT A DEVICE TO MODEL AN ANTINEUTRINO DETECTOR.

AND WHEN ALUMNA SUSAN SOLOMON DISCOVERED THE CAUSE OF OZONE DEPLETION IN ANTARCTICA.

THEY ALL SAW A CHALLENGE—AND WENT FOR IT.

SO IF YOU’RE WONDERING WHAT KIND OF PEOPLE GO TO ILLINOIS TECH, IT’S PEOPLE LIKE THEM. PEOPLE WHO ARE CURIOUS AND SHARP AND AMBITIOUS AND REBELLIOUS. PEOPLE WITH THE AUDACITY TO DO THINGS BETTER, SMARTER, AND FASTER. PEOPLE WHO ARE READY TO LIVE, SEE, DO, BE, AND OWN IT ALL. PEOPLE LIKE YOU.

YES, ALL OF IT.

AND THERE ARE OTHER RANKINGS THAT MATTER:

- WE’RE #1 IN ILLINOIS AND #24 IN THE U.S. FOR MID-CAREER EARNINGS OF GRADUATES WHO HAVE RECEIVED A BACHELOR’S DEGREE (PAYSCALE COLLEGE RETURN ON INVESTMENT REPORT 2014–15).
- ILLINOIS TECH IS CONSISTENTLY NAMED AS AN EDUCATIONAL “BEST VALUE” BY U.S. NEWS & WORLD REPORT, THE PRINCETON REVIEW, AND FISKE GUIDE TO COLLEGES.
- OUR HOMETOWN OF CHICAGO IS RANKED AS ONE OF THE TOP 10 CITIES FOR TECHNOLOGY CAREERS BY CIO.
LIVE IT
OUR CAMPUS

Even though you have Chicago as your playground, there’s so much to do on Illinois Tech’s 120-acre campus, too! You can check out a comedian, go bowling, or play video games in The Bog. Attend a talk by a visiting architect. Get your hands dirty in our urban farm and play flag football in the Quad. Swim some laps in Keating and play tennis on our courts. Grab a coffee and squeeze in some ping pong in the MTCC (while you’re there check out what’s spinning on WIIT, the university’s student-run radio station).

A STYLE ALL OUR OWN

Forbes magazine called Main Campus one of “America’s most beautiful college campuses.”

QUIDDITCH OR THE AVENGERS?

At Illinois Tech you’ll be part of a smart, dynamic group of students whose interests (and eccentricities!) are apparent in our diverse list of more than 150 student organizations.

Are you interested in…

• Photography
• Comic books
• Quidditch
• Theater
• Doctor Who
• Engineers Without Borders
• Chess
• Music
• Student government
• Volunteering
• Urban farming
• Skiing and snowboarding

…or one of any other tons of activities? You can do it here.

And at Illinois Tech you can even start your own student group!

Learn more: iit.edu/campus-life

GAME ON

Love sports? We’re proud of our legacy of excellent student-athletes. At Illinois Tech you’ll get time on the court and in the field—and still get a world-class education.

If recreation and fitness are more your speed, or you just like to stay active, you can get moving at everything from cricket and yoga to dodge ball and martial arts … even a color run!

Not an athlete at all (but still love to watch sports)? At Illinois Tech we have plenty of room in our Hawk’s Nest. Join the fan club and you can get in the game, too.

Men’s: Baseball, Basketball, Cross Country, Soccer, Swimming and Diving, Track and Field, Volleyball
Women’s: Basketball, Cross Country, Lacrosse, Soccer, Swimming and Diving, Track and Field, Volleyball

Want to be a Scarlet Hawk? Visit www.illinoistechathletics.com and click the “Recruits” tab to complete a “Recruit Me Form” for the sport you are interested in playing.
LIVE IT COOL DIGS AND MILLION $ VIEWS

Our residence halls have some pretty killer features and skyline views. Illinois Tech’s State Street Village was named one of the “coolest dorms in the nation” by U.S. News & World Report.

You’ll find built-in friendships. Your space—and your room to grow. Quiet places when you need it, and places to kick back when it’s time to unwind. Meet people. Study. Have a late-night debate in the lounge. Round up a group for a pick-up game. This is what college is all about.

And the amenities? Our residence halls are totally wired. And they’ve got cable, laundry, and fitness rooms, plus all the furnishings you need and 24/7 security. You’re steps from classes, the dining halls, outdoor spaces, and the train.

SMASHING PUMPKINS—OUR VARIETY OF CAMPUS TRADITION

For 11 years, Illinois Tech’s annual Pumpkin Launch has tested the engineering prowess of student teams, who design trebuchets, catapults—you name it—to see whose contraption can hurl a pumpkin the farthest.

GOING GEEK OR GONE GREEK?

All Illinois Tech you can do both. Our six fraternities and three sororities emphasize academics, community service, and leadership. You’ll be a part of a supportive community where at the end of the day tech rules. You can study hard, have fun, be a leader, and be your own individual.

DID SOMEBODY SAY TACOS?

You won’t go hungry here—and our popular Taco Thursdays are only the beginning. Do piza one day or go vegan the next. We’ve got your diet and cravings covered—and we’ve even got a student advisory group just for food. Plus, Chicago is one of the world’s great food cities, with every type of cuisine imaginable. Dine on campus or visit an ethnic restaurant in the city.

BE A MUCKRAKER

Since 1928, Illinois Tech students have informed and entertained the campus with TechNews, the “world’s greatest college newspaper.” Report on university news, review a new album, or write an op-ed piece. Share your voice.

JOIN THE GREEN REVOLUTION

Sustainability is important to us. Illinois Tech has solar panels on several buildings, a complex recycling and composting program, and a sustainability action plan that is addressing everything from campus vehicle emissions to stormwater use. It’s a commitment that we take seriously—and a big reason why Princeton Review named us among the greenest universities in the country.

Plus our entire Main Campus—including our first-in-Chicago research-based advanced wind turbine—is part of the Perfect Power smart microgrid project.

GRAB YOUR TRUMPET

Or violin. Or clarinet. Illinois Tech’s campus is also home to VanderCook College of Music, a highly renowned music school. All Illinois Tech students can take classes at VanderCook. So bring your instrument and keep playing!

SHIMER COLLEGE

Shimer College, the “Great Books College,” is also on our campus. All Illinois Tech students can take classes at Shimer—from literature to feminism to film history.

JUST HANG OUT

Illinois Tech students have a lot going on. When their brains hit the limit it’s time to unwind at two of the university’s main student hangouts.

The McCormick Tribune Campus Center was named among the “most amazing campus student unions” in the country (Best College Reviews). Apart from its awesome design (a Chicago “El” train runs through a 530-foot tube on top of it), the MTCC houses a coffee shop and convenience store, ping-pong tables, a full-service restaurant, lounges, football, and an outdoor beach volleyball court.

The Bog is all about entertainment—from a bowling alley to video games to a live performance venue. You can play pool, attend a spa night, hear a local band or comedian, or go dancing—and The Bog’s waffle fries are pretty legendary, too.

**SEE IT**

**CHICAGO—AND THE WORLD**

**YOUR NEIGHBORHOOD**
Illinois Tech’s surrounding Bronzeville and Bridgeport neighborhoods have tons of history and just as much personality. You can check out an edgy art gallery, eat at an old-school soul food restaurant or Italian café, or ride your bike along the lakewalk, less than one mile from campus. The cool stores and restaurants of bustling Chinatown, Pilsen, and South Loop are nearby, too. Diversity is right outside your door.

**YOUR CITY**
Chicago is a go-anywhere, do-anything global city. Go to a game—Blackhawks, Bears, Cubs, Fire, Sky, White Sox. Visit one of the world’s best museums. Get lost in world-renowned architecture. Dine at a five-star restaurant or chow down at a hole-in-the-wall. Go to a Broadway play, or go see your favorite band in concert. You can do it all—and it’s all just minutes from Main Campus.

**YOUR WORLD**
Stop and talk to someone walking across Illinois Tech’s campus and chances are you’ll get a mini-geography lesson. Our students come from the coasts of Saint Lucia, the mountains of Vietnam, and the cities of Brazil. We have a multinational student body with students from 100 countries and all 50 states.

And you can get out there and see it firsthand, too. Illinois Tech offers study abroad program options on six continents for every major, along with internship and volunteer opportunities.

**GET OUT AND GET AROUND**
Every Illinois Tech undergrad receives a Ventra U-Pass, which gives you unlimited access to CTA public transportation citywide. Take the “EL” downtown. Catch a bus to go shopping. Or explore one of Chicago’s seemingly endless number of neighborhoods, each with its own unique personality and attractions. Your U-Pass will get you there.

Want to create your own route? Hop on a Divvy bike share at one of the on-campus bike stations, and cruise anywhere you like.
DO IT
STUDY AND RESEARCH

Academic Programs with a Technology Focus
At Illinois Tech our students describe our programs as challenging, focused, and demanding—and employers say they hire our graduates because they can “hit the ground running.” What makes our undergraduate education different is a focus on emerging technologies and our interdisciplinary, collaborative programs. When we say we’re different, we mean it.

RESEARCH
YES, EVEN AS AN UNDERGRAD!
Is there a topic that really drives you? Illinois Tech’s Office of Undergraduate Research connects undergrads with research opportunities. You’ll find opportunities through Illinois Tech’s research affiliates, including Argonne National Lab and Fermilab, plus companies on campus at University Technology Park and throughout Chicago. Many of our faculty are experts in their fields and offer a direct line to research opportunities in the greater Chicago area and beyond. There are even programs that provide undergraduates stipends for research.

Matthew Spenko
Associate Professor of Mechanical Engineering
B.S. Northwestern University,
M.S. and Ph.D. Massachusetts Institute of Technology
Director, IIT Robotics Lab
Designs mobile hybrid robots that go where other robots can’t (for his robot’s gecko-like gripper, that may include outer space to clean up space debris)

Carly Kocurek
Assistant Professor of Digital Humanities and Media Studies
B.A. Rice University, M.A. and Ph.D. University of Texas at Austin
A cultural historian and authority on video gaming and new media technologies, is co-authoring a book series about significant game designers

Carlo Segre
Duchossois Leadership Professor,
Professor of Physics
B.S. University of Illinois at Urbana-Champaign
Ph.D. University of California, San Diego
Range of projects includes nanoelectrofuels for innovative batteries, crystal optic devices for delivery and detection of X-rays at synchrotron beamlines, and the Chicago-area bridge building competition for high school students

Weslynne Ashton
Assistant Professor of Environmental Management and Sustainability
B.S. Massachusetts Institute of Technology,
M.S. and Ph.D. Yale University
Led a three-year multinational effort to promote and facilitate cleaner production and sustainable industrial development throughout the Americas

Gaby Sumampouw (Chemical Engineering ’15), from Indonesia, is researching how to offset fossil fuels use by creating biofuels from algae. It’s just one of the many opportunities on campus that engage undergraduates in research with real-world applications.

Meet a Few of our Rock Stars
You’ll be learning from them!

Academic Programs with a Technology Focus
At Illinois Tech our students describe our programs as challenging, focused, and demanding—and employers say they hire our graduates because they can “hit the ground running.” What makes our undergraduate education different is a focus on emerging technologies and our interdisciplinary, collaborative programs. When we say we’re different, we mean it.
DO IT MORE MATHLETE THAN ATHLETE?

Perhaps your idea of a sporting event is building a robot that will totally crush the competition (literally and figuratively). Illinois Tech’s student academic-oriented groups and special programs offer something for aspiring architects, entrepreneurs, inventors—you name it.

- Design a quadcopter in Illinois Tech Robotics or join the IIT Robotics Lab
- Test your Capture the Flag skills in HackIIT
- Develop ways to hide covert files in an MP3 in the Cyber Forensics and Security Lab
- Pitch your idea for a cool new gadget in IIT CEO
- Research a building while studying abroad in the IIT Berlin++Summer Program
- Form your own group and design a chainless, fluid-powered bicycle for a national competition

In spring 2015, students in Professor Frank Flury’s Design/Build studio designed a prototype rural hospital, and during the summer they collaborated with local villagers in the Magetang district of Indonesia to build the clinic in the Central Java Province. During the previous summer, another group of students and alumni built a library/study space for secondary school students in the rural village of Twifo Hemang, Ghana.

ELECTRIC VEHICLE DEVELOPED BY ILLINOIS TECH STUDENTS

Students in the IIT Motorsports club designed and built an electric vehicle that won the 2015 Fiat Chrysler Automobiles Innovation Award at the Formula Hybrid Competition. Below are a few ideas that made their WISER Tomahawk innovative.

How It Works: The IIT WISER Tomahawk

- Direct drive hub motors
- Each wheel has its own custom, permanent liquid-cooled magnet motor
- Carbon fiber frame
- Reduced weight of Tomahawk by more than 50 percent over previous student-built cars
- Prismatic cell battery
- Flat instead of rounded, an improvement over the previous ultra-capacitor battery

If you want to know about crime in your neighborhood—or where a crime might take place next—you could talk to your local beat cop or consult the police blotter. Or you could ask Luis Larco (Electrical and Computer Engineering ’15).

While an Illinois Tech student, Luis, from Miami, Florida, worked with Professor Miles Wernick on a crime prediction project for the Chicago Police Department. The project involved developing tools that the CPD could use to develop a nuanced understanding of categories of crime—including social networking analysis, data mining, statistical machine learning, pattern classification, and computer-aided diagnosis. Luis helped to translate the data into a user-friendly website that can guide police officers when they assess variables in crime patterns on any given beat.

“This is one of the perfect examples of why I love my field,” Luis says, noting he’s “helping my community by developing tools that help the police department reduce crime in the city.”
OUR KIND OF SUPERHEROES

Who doesn’t want to be a superhero? At Illinois Tech our students are super-humans in training—real people using real superpowers to change the world for the better.

Students like Tyler Grudowski (Mechanical Engineering 3rd year), from Orland Park, Illinois, whose IPRO class is working to design a supinating arm for a robotic standing wheelchair designed by fellow students. His team’s goal is to provide increased mobility for people who have a disability but don’t need to be confined to a wheelchair.

“The majority of students come to Illinois Tech to get a great education because they want to make a positive impact on people’s lives,” Tyler says.

So yes. Magical hammers and force fields are cool—but we’ll take a world-class STEM education any day.

IPRO Program

One of Illinois Tech’s bragging rights is our flagship Interprofessional Projects (IPRO) Program. We started it in 1995, and it’s still one of only a few programs like it in the country. In IPRO you’ll work with other students from various majors to develop a solution to a real-world problem. If you’re already thinking about your post-college career, you’ll have a leg up—employers tell us they hire grads with the same teamwork and leadership skills that Illinois Tech students learn in IPRO.

Recent IPRO student teams have:
- Developed a prototype desalination device for the Sahara
- Built sustainable water distribution systems in Haiti
- Started a “smart recycling” system on campus
- Developed renovations for a historic neighborhood theater
- Reimagined the failed 1940s Antarctic Snow Cruiser
- Developed an assistive device to help visually impaired people swim
- Devised a mobile operating room for disaster relief in third-world countries

The Idea Shop is where you can transform your ideas into reality. This 13,000-square-foot innovation hub has serious tools: a state-of-the-art, rapid-prototyping lab featuring 3D printers and a 3D scanner, multiple CNC milling machines, a vacuum former, and laser cutter. It’s one-part entrepreneurial center and one-part gathering place, with full-time staff dedicated to helping you test the limits of your imagination.

Illinois Tech also has a Machine Shop on campus where you can fabricate and design pretty much anything for a class, do metalworking projects, and use a precision-cutting machine.

The Idea Shop: where you can transform your ideas into reality. Illinois Tech also has a Machine Shop on campus where you can fabricate and design pretty much anything for a class, do metalworking projects, and use a precision-cutting machine.

DO IT

ASK “WHAT IF?” AND SHOUT “WHY NOT!” YOU CAN BUILD IT IN THE IDEA SHOP

“When I found out that there was a place at IIT entirely devoted to creation, I was blown away.”

—Dane Christianson (Mechanical Engineering ’15), from Batavia, Illinois, who built the 52 moving parts of his X-Cube twisty puzzle using 3D printers in the Idea Shop during his sophomore year at Illinois Tech. The X-Cube is now sold at Marbles: The Brain Store.
BE IT

HANG WITH THE SMART KIDS

AT ILLINOIS TECH YOU CAN BE ANYTHING—MORE IMPORTANTLY, YOU CAN BE YOURSELF. NERD OUT ON POLYMERS. DIVE INTO EXASCALE COMPUTING. STUDY THE NATIONALIST MOVEMENTS IN LATIN AMERICA. OR STUDY ALL OF THEM. BE WHOEVER YOU WANT TO BE.

OUR RECENT GRADS WERE ONCE JUST LIKE YOU—FINDING THEIR WAY AND EXPLORING THEIR DREAMS. ILLINOIS TECH HELPED THEM GET THERE. MEET THE NEXT GENERATION OF GREAT INNOVATORS AND ENTREPRENEURS—AND PREPARE TO JOIN THEM.

Katherine Darnstadt (Architecture ’05) solves architectural problems in breakthrough ways. When the firm that she founded was asked to address a South Side Chicago food desert, she designed a bus—not a building—to provide the best solution.

After acquiring an old Chicago Transit Authority bus and poring over its manual, her firm converted it into Fresh Moves, a mobile grocery store packed with produce. Fresh Moves Mobile Markets are now part of a City of Chicago initiative providing affordable fresh fruits and vegetables to underserved areas on the city’s south and west sides.

“If you think about it, we all drive our cars on a faith-based system,” says Nishanth Samala (Computer Science ’14). “We get into our car and hope and pray that it drives that day and no weird dashboard lights or sounds go off. Most of us have no idea what is going on inside, what to do when problems occur, or how much fixing all of it should cost.”

A $2,000 invoice for routine maintenance on his car got Nishanth thinking. He wondered why it cost so much and more importantly, why there was such an imbalance of available information between those who drove their cars and those who fixed them.

“"If you think about it, we all drive our cars on a faith-based system," says Nishanth Samala (Computer Science ’14). "We get into our car and hope and pray that it drives that day and no weird dashboard lights or sounds go off. Most of us have no idea what is going on inside, what to do when problems occur, or how much fixing all of it should cost."

A $2,000 invoice for routine maintenance on his car got Nishanth thinking. He wondered why it cost so much and more importantly, why there was such an imbalance of available information between those who drove their cars and those who fixed them.

So Nishanth developed Strados, a machine-learning platform that predicts car health. The Strados app translates raw computer signals from a car into relatable emotions and text. When connected with a maintenance provider, this data can be used to preempt issues and save drivers money.

Nishanth credits his first Interprofessional Projects (IPRO) Program project—an unmanned aerial vehicle—for leading him to a degree in computer science and Strados. Inc. included Strados on its list of “America’s Coolest College Startups 2014.”

When Emmanuel Klu (Computer Science ’13) asked his parents’ permission to leave their home in Ghana and travel to the United States to attend Illinois Tech, none of them likely anticipated the miles Emmanuel would log elsewhere throughout the world. An intrepid backpacker, he has visited 21 states and six European countries.

Emmanuel concluded this latest trip by jumping into a journey of a different type—his new role as a software engineer with the corporate engineering team at Google in Mountain View, California.

“This is an exciting opportunity to work on something new in a small team,” says Emmanuel. “I believe that it gives me the chance to contribute directly to innovation at Google, and at a very fast pace.”
OWN IT
INNOVATION BEGINS HERE

ILLINOIS TECH ALUMNI INNOVATORS
KNOW OUR CHANGE-MAKERS

When you graduate you’ll join all of them around the world in the get-ahead-and-do-big-things club. And when we say around the world, we mean all 3,959 miles of it: Our alumni are in more than 128 countries and all 50 states.

OWN IT
INNOVATION BEGINS HERE

ILLINOIS TECH ALUMNI INNOVATORS
KNOW OUR CHANGE-MAKERS

When you graduate you’ll join all of them around the world in the get-ahead-and-do-big-things club. And when we say around the world, we mean all 3,959 miles of it: Our alumni are in more than 128 countries and all 50 states.

Think this building by the world-renowned architect (and current Illinois Tech professor) John Ronan is cool? This will be one of your classrooms when you get here. Our new Ed Kaplan Family Institute for Innovation and Tech Entrepreneurship will also house the rapid-prototyping Idea Shop, the IPRO Program, and work spaces where your entrepreneurial endeavors can incubate and flourish. It will be a hub for creativity and exploration on campus.

*Into architecture? The Innovation Center will be a living laboratory for cutting-edge design. Its first-in-Chicago dynamic facade of ETFE (ethylene tetrafluoroethylene) foil cushions will vary the amount of solar energy entering the building through sophisticated pneumatics and give the building a light, cloud-like appearance.
ACADEMIC PROGRAMS

Illinois Tech offers undergraduate programs in the following colleges and schools:

Academic Minors
You can broaden your skills and pursue your other academic interests with a minor in one of a number of areas of study. Just a few examples of academic minors include:

- Artificial Intelligence
- Information Security
- Information Architecture
- Programming Languages
- Internet Application Development
- Entrepreneurship
- Human Resources
- Public Administration
- Military/Naval Science
- Environmental Engineering
- Engineering Graphics and CAD
- Rehabilitation Services
- STEM Education
- Literature
- History
- Music
- Urban Studies and many more!

Double Down: Your Ultimate Academic Twofer
Illinois Tech offers a special program that allows you to complete both your bachelor’s and master’s degrees in as few as five years. And you get to keep your undergraduate scholarships in your fifth year! Examples include:

- B.S. in Applied Mathematics/M.S. in Computer Science
- B.S. in Information Technology and Management/M.S. in Cyber Forensics and Security
- B.S. in Physics/M.S. in Health Physics
- B.S. in Biochemistry/M.S. in Food Safety and Technology
- B.S. in Computer Science/M.S. in Intellectual Property Management and Markets
- And over 50 more!

It’s focused, highly specialized, saves you money—and you can earn your second degree in one of more than 50 areas.

Combined Undergraduate/Graduate Law Programs (leading to B.S./J.D. degrees)
Law school classes are taken at Illinois Tech’s Chicago-Kent College of Law. Students have access to pre-law advising and LSAT preparation assistance.

For more about majors, minors, and academic programs in between, visit admissions.iit.edu/undergraduate/programs

In addition to the undergraduate programs offered by each of these six colleges, students may go on to attend graduate school in one of Illinois Tech’s two other colleges: Chicago-Kent College of Law and the Institute of Design.

We get it. We really do. If you have a lot of ideas about what you want your major to be, it’s OK. You’re not alone. If you choose to come to Illinois Tech as undecided, you can delay your selection of a major until your sophomore year.

Choose from Undecided Engineering, Undecided Science, or General Undecided (business, applied technology, communication, humanities, psychology) to get started. You’ll take courses in every department—and along the way you’ll find the path that’s right for you.

And you have alternatives if you realize that your major really isn’t right for you. Changing to any of our 36 majors simply requires a conversation with your academic counselor.
Armour College of Engineering

Armour College of Engineering has been educating world-class engineers since the university’s founding in 1890. As a twenty-first-century engineering student, you’ll learn the principles of your profession and work in an interdisciplinary environment that emphasizes hands-on learning, teamwork, and leadership.

Our newly renovated John T. Rettaliata Engineering Center is designed specifically to encourage an intersection of ideas, featuring spaces where you and fellow students can work together to develop the next innovative idea. At Armour College we integrate innovative thought, entrepreneurship, creativity, and design with engineering theory, research, and practice. You’ll get the chance to work on projects that are normally open only to graduate students and to apply what you’ve learned in the classroom to complex problems facing society today.

Distinctive Programs: IIT Engineering Themes and Armour R&D

We enhance our classroom experiences with "seats!" through our IIT Engineering Themes programs, such as lecture series, forms, interactive problem-solving exercises, professional site exploration, and team-intensive engineering projects that focus on water, health, energy, and security. Our automated IIT Engineering Themes Portfolio will aid you in building a personal problem-solving exercises, professional site exploration, and team-intensive Engineering Themes program, such as lecture series, forms, interactive
teaching theme, our students will collectively design and construct full-scale buildings—fulfilling the notion of a "hands-on" education.

College of Architecture

The College of Architecture teaches students how to see architecture through a different lens—and how to become self-constructors who glean knowledge from the world around them. Our B.Arch. curriculum is centered on a studio sequence of increasing complexity. You’ll study topics from the basic building elements to the complex city itself. In addition to design, the courses include architectural history and theory, building technologies, structures, design communication, and professional practice as well as a range of courses beyond architecture.

A five-year, NAAB-accredited professional degree allows you to enter the workplace with a degree recognized as comparable for licensure by state registration boards. The college has more than 700 students from 50 countries and 100-plus faculty members. Ninety-five percent of our faculty are practicing architects.

Our B.Arch. curriculum comprises 25 years after the university’s founding in 1890. As a twenty-first-century engineering student, you’ll learn the principles of your profession and work in an interdisciplinary environment that emphasizes hands-on learning, teamwork, and leadership.

A five-year, NAAB-accredited professional degree allows you to enter the workplace with a degree recognized as comparable for licensure by state registration boards. The college has more than 700 students from 50 countries and 100-plus faculty members. Ninety-five percent of our faculty are practicing architects.

Our B.Arch. curriculum comprises 25 years after the university’s founding in 1890. As a twenty-first-century engineering student, you’ll learn the principles of your profession and work in an interdisciplinary environment that emphasizes hands-on learning, teamwork, and leadership.

Our newly renovated John T. Rettaliata Engineering Center is designed specifically to encourage an intersection of ideas, featuring spaces where you and fellow students can work together to develop the next innovative idea. At Armour College we integrate innovative thought, entrepreneurship, creativity, and design with engineering theory, research, and practice. You’ll get the chance to work on projects that are normally open only to graduate students and to apply what you’ve learned in the classroom to complex problems facing society today.

Distinctive Programs: IIT Engineering Themes and Armour R&D

We enhance our classroom experiences with "seats!" through our IIT Engineering Themes programs, such as lecture series, forms, interactive problem-solving exercises, professional site exploration, and team-intensive engineering projects that focus on water, health, energy, and security. Our automated IIT Engineering Themes Portfolio will aid you in building a personal problem-solving exercises, professional site exploration, and team-intensive Engineering Themes program, such as lecture series, forms, interactive
teaching theme, our students will collectively design and construct full-scale buildings—fulfilling the notion of a "hands-on" education.

College of Architecture

The College of Architecture teaches students how to see architecture through a different lens—and how to become self-constructors who glean knowledge from the world around them. Our B.Arch. curriculum is centered on a studio sequence of increasing complexity. You’ll study topics from the basic building elements to the complex city itself. In addition to design, the courses include architectural history and theory, building technologies, structures, design communication, and professional practice as well as a range of courses beyond architecture.

A five-year, NAAB-accredited professional degree allows you to enter the workplace with a degree recognized as comparable for licensure by state registration boards. The college has more than 700 students from 50 countries and 100-plus faculty members. Ninety-five percent of our faculty are practicing architects.
School of Applied Technology

The School of Applied Technology combines a hands-on, industry-based, project-focused approach with an understanding of how management principles apply to technology. You will learn the information technology disciplines of management, development, technology and theory, operations, and security—and the professional skills to be a corporate innovator and tech entrepreneur.

Distinctive Program: Project-Based Learning

Industry-sponsored projects provide you with opportunities to work in group situations and to produce portfolios of your work. Faculty with significant industry experience will teach your classes and help guide your professional development. You will make presentations both in class and at professional events, and document your projects in academic publications. Like other SAT graduates, you’ll be able to demonstrate what you have accomplished—and not just what you have learned.

Recent student projects have addressed:
- Providing 911 operators the indoor location of people making emergency calls on mobile phones
- Creating a SIP-based telephone service for the Illinois Tech community
- Wearable computing and clothing-based proximity sensors for the visually impaired
- Cyber forensics, steganography, and security

Undergraduate Programs

Bachelor of Information Technology and Management

Option to complete a graduate degree simultaneously with your Bachelor of Information Technology and Management

Undergraduate Programs

Bachelor of Science in Business Administration (B.S.)
B.S./Master of Public Administration (M.P.A.), B.S./M.S. Finance, and B.S./M.S. Marketing Analytics
Dual Admission B.S./J.D. Doctor (J.D.)
Minor in Business
Minor in Economics
Minor in Entrepreneurship

Stuart School of Business

At Stuart School of Business you’ll learn the language of tech and innovation with the added advantage of living in Chicago—internationally renowned as a “place to do business” and a growing tech hub. In addition to studying with outstanding business faculty who have advanced degrees in science, engineering, and technology-based disciplines, you’ll have the chance to interact with some of the best business, management, and entrepreneurial talent in the world.

Our programs emphasize analytics and quantitative methodologies, hands-on learning, and real-world problem solving. You’ll learn how to collaborate with—and lead—interdisciplinary teams by working on highly innovative, technology-driven projects.

Distinctive Program: Entrepreneurship

Stuart classes include a focus on entrepreneurship and innovation, and feature numerous opportunities to work on projects for real clients in the Chicago area. Outside of the classroom, a variety of entrepreneurial and financial student competitions allow you to apply your skills and gain recognition from your peers and future employers.

Undergraduate Programs

Bachelor of Science in Business Administration (B.S.)
B.S./Master of Public Administration (M.P.A.), B.S./M.S. Finance, and B.S./M.S. Marketing Analytics
Dual Admission B.S./J.D. Doctor (J.D.)
Minor in Business
Minor in Economics
Minor in Entrepreneurship

Software Development

IF YOU’RE INTO MATH AND INNOVATION, AND ARE INTERESTED IN THE THEORETICAL CONCEPTS BEHIND THE TECHNOLOGY, COMPUTER SCIENCE COULD BE A GOOD FIT FOR YOU. YOU’LL LEARN THE PROGRAMMING PARADIGMS AND WHEN-AND WHICH—IS MOST APPLICABLE, WHICH WILL ENABLE YOU TO KEEP UP WITH THE RAPIDLY CHANGING FIELD. BEYOND THE FUNDAMENTALS, YOU’LL BE ABLE TO FOCUS IN AREAS OF DATA MINING, INFORMATION SECURITY, ARTIFICIAL INTELLIGENCE, AND DISTRIBUTED COMPUTING. CREATE THE NEXT PROGRAMMING LANGUAGE!

Information Technology and Management (School of Applied Technology)

This major is about knowing and managing IT—and translating it into a useful business tool. Our ITM program integrates theoretical principles with applied hands-on laboratory and project collaboration. You’ll learn about a variety of IT fields, including Web and application development, system architecture, networking, database systems, systems security, contemporary programming languages, and more.

Not sure if any of these are right for you? Illinois Tech has many other tech-centered programs, including digital humanities, bioinformatics, applied analytics, and business with which to specialize. Our admission counselors can walk you through the options, and we can connect you with professors in a given major who can provide you more details.

Finding the Right Fit for You

Computer Science, Computer Engineering, or Information Technology?

You love tech. Computers, coding, the industry—what makes it all tick. You know you want to work in this field, you’re just not sure which major is best for you.

At Illinois Tech we’ll help you find the right path. Here are three academic majors that students often choose between, and a bit about each degree program.

Computer Science (College of Science)

If you’re into math and innovation, and are interested in the theoretical concepts behind the technology, computer science could be a good fit for you. You’ll learn programming paradigms and when—and which—is most applicable, which will enable you to keep up with the rapidly changing field. Beyond the fundamentals, you’ll be able to focus in areas of data mining, information security, artificial intelligence, and distributed computing. Create the next programming language!

Computer Engineering (Armour College of Engineering)

Are you drawn to the electrical and hardware components of computing? If yes, then computer engineering may be the way to go. You’ll study everything from the microarchitecture to the embedded computing devices to laptop and desktop systems to supercomputers. You’ll work on how data is communicated among electronic components, how software is written for specific hardware platforms, and how microprocessors are designed and optimized from an electrical engineering viewpoint.

Information Technology and Management (School of Applied Technology)

This major is about knowing and managing IT—and translating it into a useful business tool. Our ITM program integrates theoretical principles with applied hands-on laboratory and project collaboration. You’ll learn about a variety of IT fields, including Web and application development, system architecture, networking, database systems, systems security, contemporary programming languages, and more.

Not sure if any of these are right for you? Illinois Tech has many other tech-centered programs, including digital humanities, bioinformatics, applied analytics, and business with which to specialize. Our admission counselors can walk you through the options, and we can connect you with professors in a given major who can provide you more details.

Pre-Med and Pre-Health Programs

At Illinois Tech, science, engineering, and technology are in our DNA. If you’re interested in going to medical school one day, our pre-med program can give you the best of both worlds—rigorous training and personalized academic experiences—and prepare you for your future.

We offer joint programs in medicine that can lead to a B.S. degree from Illinois Tech and a D.O., M.D., or D.D.S. degree from Chicago-area schools. You can also apply to our pre-pharmacy program, which allows early entrance into pharmacy school at Midwestern University.

You can minor in pre-medical studies, which ensures completion of all prerequisites for entrance into medical school and prepares you for your M.D.

Illinois Tech’s Main Campus is minutes away from some of the country’s best hospitals. Find opportunities for experience right here in Chicago.

B.S./M.D./D.O./D./Pharm.D. Programs

In addition to pre-medical studies, Illinois Tech offers four dual-degree programs:

- B.S./B.S. in Business Administration (B.S.)/M.D. at Illinois Tech/University of Chicago (School of Medicine)
- B.S./B.S. in Business Administration (B.S.)/D.O. at Illinois Tech/Illinois College of Osteopathic Medicine
- B.S./B.S. in Business Administration (B.S.)/D.D.S. at Illinois Tech/Illinois College of Dentistry
- B.S./B.S. in Business Administration (B.S.)/Pharm.D. at Illinois Tech/Illinois College of Pharmacy

Students earn a bachelor’s degree from Illinois Tech and a medical degree from the medical, pharmacy, or optometry school.

Pre-Health Programs

B.S./M.D./D.O./D./Pharm.D. Programs

In addition to pre-medical studies, Illinois Tech offers four dual-degree programs:

- B.S./B.S. in Business Administration (B.S.)/M.D. at Illinois Tech/University of Chicago (School of Medicine)
- B.S./B.S. in Business Administration (B.S.)/D.O. at Illinois Tech/Illinois College of Osteopathic Medicine
- B.S./B.S. in Business Administration (B.S.)/D.D.S. at Illinois Tech/Illinois College of Dentistry
- B.S./B.S. in Business Administration (B.S.)/Pharm.D. at Illinois Tech/Illinois College of Pharmacy

Students earn a bachelor’s degree from Illinois Tech and a medical degree from the medical, pharmacy, or optometry school.

appliedtech.iit.edu

“MOST SAT CLASSES CAN BE TAKEN ONLINE. SO IF YOU ARE SOMEWHERE REMOTE, YOU CAN STILL ATTEND CLASS VIRTUALLY OR EVEN WATCH SCREEN RECORDINGS IF THE CLASS HAS HAPPENED.”

-DORIS NILKURH, INFORMATION TECHNOLOGY AND MANAGEMENT, TEL AVIV, ISRAEL

“BEING AT IUT TAUGHT ME THE VALUE OF THE BUSINESS SCHOOL RESIDING AT A TECH-SCHOOL. A MANDATORY COMPUTER SCIENCE CLASS TAUGHT ME THAT PROGRAMMING WASN’T FOR ME. BUT I APPRECIATE AND VALUE MY RELATIONSHIPS WITH THOSE WHO STUDY COMPUTER SCIENCE. THE TECH-CLASSES HELPED ME MOVE FROM JUST BEING A MARKETING STUDENT TO SEEING MYSELF AS A SOCIAL MEDIA MARKETER.”

-GWIN ENO, BUSINESS ADMINISTRATION (B.S.), PENANG, MALAYSIA
Important Dates and Deadlines

We recommend submitting your application as early as possible. Our admission counselors are available to guide you through the process and answer any questions you and your family may have. Some dual-degree programs and scholarships have special deadlines (see below).

**SPECIAL SCHOLARSHIPS DEADLINES**
December 1:
- Camras, Crown, Duchossois, University

**DUAL ADMISSION PROGRAMS DEADLINES**
December 1:
- B.S./D.O.
February 1:
- B.S./J.D., Pharm.D.

**ROLLING ADMISSION DEADLINES**
FOR FALL 2016 ADMISSION (classes begin August 2016)
May 15:
- Admission deadline for international students living outside the U.S.
August 1:
- Admission deadline for students living in the U.S.

**NOTIFICATION PROCESS**
Illinois Tech announces decisions beginning in October and within a few weeks of receiving your completed application materials.

Application Requirements and Steps—Free to Apply
Illinois Tech is looking for students of high academic caliber with strong community ties and work ethic. In the application, we evaluate your academic standing, extracurricular activities, and community-based leadership involvement. We also like to hear why you think an education at Illinois Tech would help you pursue your academic and career goals and how you could contribute to the Illinois Tech community. Be specific. We want to hear your story!

**STEP 1: COMPLETE AN APPLICATION FOR ADMISSION**
Applications are available online through the Common Application (apply.commonapp.org).

**STEP 2: LETTER OF RECOMMENDATION**
Choose a teacher who knows you well and can write about your strengths as a student. One letter is required but up to three are accepted. This can be submitted electronically by the teacher through the Common Application.

**STEP 3: HIGH SCHOOL/SECONDARY SCHOOL TRANSCRIPTS**
Ask your high school counselor to submit your official high school/secondary school transcripts to the Office of Undergraduate Admission.

**STEP 4: TEST SCORES**
Send official ACT or SAT scores to the Office of Undergraduate Admission. Illinois’s ACT code is 1040; the SAT code is 1318.

High School Requirements
Students engaged in a college preparatory or general education curriculum generally make good candidates for Illinois Tech. Specifically, we recommend the following high school courses be completed:

- 4 years of English
- 4 years of mathematics
- 3 years of science (4 for engineering and science majors)
- 2 years of social science

**STUDENTS FROM OTHER COUNTRIES**
- 20% are in the top 10% of their graduating class
- ACT: 25–30
- SAT: 1160–1350

**FIRST-YEAR CLASS PROFILE AND ACADEMIC HIGHLIGHTS**
- 44% Students from outside Illinois
- 13:1 Student-to-faculty ratio
- 3.98 Average weighted high school G.P.A.
- 91% First-to-second-year retention rate
- 20% Students from other countries
- 56% In top 10% of graduating class
- MIDDLE 50% ACT: 25–30 SAT: 1160–1350

Learn—and Serve. Join ROTC!
Want to apply your tech background to a military career? Illinois Tech can prepare you to succeed in both areas. We have Reserve Officer Training Corp (ROTC) programs for the Army, Navy, Marines, and Air Force. You’ll gain advanced leadership skills and test yourself physically and mentally.

If you haven’t applied to Illinois Tech yet, it’s time to get started. Here’s how to begin!
IT’S ALL HERE
FINANCING YOUR DEGREE

Think college is expensive?

It’s important to consider not just the cost of your education but the long-term value. Illinois Tech creates opportunities in the most in-demand fields—and the returns for our graduates in both the workplace and their daily lives are well documented.

If you’re wondering whether you can afford such a great education, perhaps the better question is: Can you afford to pass it up?

More than 98 percent of our students receive some form of financial aid—so we’ve had a lot of practice delivering on our promise to make an Illinois Tech education affordable for you.

Learn more about financial aid: iit.edu/financial-aid

ILLINOIS TECH
FINANCIAL AID PROCESS

Receive scholarship award letter upon admission to Illinois Tech

January 1: Submit FAFSA online
  - www.fafsa.ed.gov
  - Illinois Tech code: 001691

Mid-March: Receive a complete award package

To help determine your eligibility, please use our net price calculator at www.collegescholarshipcalculator.org/iit

SCHOLARSHIPS

We’re #1 in Illinois and #24 in the U.S. for mid-career earnings of graduates who have received a bachelor’s degree (PayScale College Return on Investment Report 2014–15).

Need-Based Grants

- Awarded to students with need, as determined by the Free Application for Federal Student Aid (FAFSA)
- Many students who do not qualify for federal or state aid will qualify for institutional grants

To help determine your eligibility, please use our net price calculator at www.collegescholarshipcalculator.org/iit

Tuition

$42,000
2015–16 undergraduate tuition

Room and Board

$11,300
On-campus room and board costs vary depending on selection of campus housing and meal plan

Fees

$1,680
Costs estimated for housing based on FAFSA housing selection (on-campus, off-campus, with parents)

We’d love to help you find the right scholarship option. Here are some of the many opportunities available at Illinois Tech:

Special Scholarships

Illinois Tech’s special scholarships range from full tuition to housing and summer research stipends. Most of these scholarships require an additional application and/or interview.

Special application required, apply by December 1

Duchossois Leadership Scholars Program

Elite scholarship program for top students from across the country who have demonstrated exceptional leadership potential and academic success in their projected fields

Crown Scholarship

The College of Architecture’s most prestigious and selective scholarship

No additional application needed, apply by December 1

University Scholars Program

For students demonstrating excellent high school grades, standardized test scores, personal qualities, and extracurricular involvement

Additional application required, awarded on a rolling basis

Illinois Tech/FIRST Scholarship

For students who participated in a FIRST Robotics Competition or a FIRST Tech Challenge in high school

Chicago Police and Fire Departments Scholarship

Awarded to children and grandchildren of members of the Chicago Police Department, Chicago Fire Department, and Chicago Paramedics Department

Collens Scholars Program

Students with significant need who are graduating from a Chicago public high school or a Chicago charter high school

VISIT US

Get an in-depth look at our academic programs, campus life, and the admission and financial aid processes—and see firsthand what it’s like to be a Scarlet Hawk!

Discover IIT Days
Discover Illinois Tech for yourself during these open house events with campus tours, academic sessions, and more! Visit us on these upcoming Saturdays:
- October 17, 2015
  (Be sure to check out Illinois Tech’s annual Pumpkin Launch student competition, too!)
- April 30, 2016
- July 9, 2016
- August 6, 2016

24-Hour Hawk Life: Overnight Visits
Spend the night on campus with a current student and immerse yourself in life at Illinois Tech. Check out everything from classrooms to where students go for a late-night bite.

Daily Visits
Pick a day that’s convenient for you to visit with an admission counselor, take a tour, meet our students, hear from our faculty, and just get to know Illinois Tech.

visit.iit.edu

PARENTS AND FAMILIES!
We know you’re sifting through mountains of college brochures, too. Illinois Tech welcomes you to learn more about our university—why and how we’re really different. We have created an online forum just for parents, families, and anyone else who wants to know more about connecting a student with Illinois Tech.

BE A PART OF IT
Undergraduate Admission page for parents, with a parent-focused list of resources from deadlines to financial aid to safety
admissions.iit.edu/undergraduate/parents

IIT Parent Network for parents of admitted students, offering news and more
web.iit.edu/campus-life/parent-network/join

Our admission ambassadors lead campus tours throughout the year. There’s no better way to get the “low down” about Illinois Tech than to hear it from our own students!
