At IIT, political science is more than just a theoretical discussion; it is an applied discipline that will give you the practical skills to identify and analyze real-world problems through the use of quantitative and qualitative research methods and policy analysis. At the same time, you will gain an understanding of major concepts, and the workings of political institutions. Here, you’ll study international relations, comparative politics, urban politics, and public policy.

**IIT’s Political Science program** places a high premium on real-life experience, drawing strength from the diverse range of professional and academic experiences of our faculty. They come from international backgrounds, have lived and worked in countries around the globe, and, together, they greatly inform this program’s wealth of expertise.
Studying political science at IIT, which is most well-known for its technology-focused programs, offers you the unique opportunity to collaborate with your friends in engineering, architecture, computer science, business and life sciences. Our interdisciplinary approach culminates in the Interprofessional Projects Program (IPRO), which brings together student teams from across disciplines to solve a common problem. With technology playing an increasingly central role in our daily lives, having this hands-on collaborative experience gives our students a big advantage in the job market.

Not to mention, living in the heart of Chicago is an extraordinary education in and of itself!

AFTER IIT
The unique combination of abilities you gain at IIT will help you jumpstart a career that makes a practical difference in the world. Here are some of the fields our graduates enter:

- Community organizing
- Policy analysis
- Government administration
- Diplomacy
- Political activism

Denzel Avant

"I had always been interested in politics: understanding inner-city poverty and why urban neighborhoods are so segregated. When you study politics, there is no better real-world laboratory than Chicago. The opportunities for fieldwork here are countless."
