We asked some current students why they chose Illinois Tech. Here’s what they told us. No filter, unedited, uncut.
WE’RE A PLACE WHERE YOU CAN

LIVE IT
SEE IT
DO IT
BE IT
OWN IT

To learn more about Dane and his X-Cube puzzle, flip to page 13.
SOME SCHOOLS MAY GET A LOT OF ATTENTION. BUT AT MANY OF THEM IT’S EASY TO GET LOST IN THE CROWD. ILLINOIS TECH IS SMALL BUT MIGHTY. WE’RE SMART, CREATIVE, PROBLEM-SOLVERS. PEOPLE WHO GET THINGS DONE.

SO WE WEREN’T SURPRISED WHEN BUSINESS INSIDER NAMED ILLINOIS TECH AMONG THE “50 MOST UNDERRATED COLLEGES IN AMERICA.”* BECAUSE WE’RE COOL LIKE THAT. WE’VE GOT ALL THE CONFIDENCE OF A BEST-KEPT SECRET—EDUCATING THE BRIGHTEST STUDENTS IN THE COUNTRY, INVENTING THE FUTURE, TALKING THE TALK, AND WALKING THE WALK. AND GETTING NOTICED—WHEN IT REALLY MATTERS.

LIKE WHEN ILLINOIS TECH ALUMNUS MARTY COOPER INVENTED THE CELL PHONE.

AND WHEN 2015 GRAD DANE CHRISTIANSON BUILT HIS X-CUBE PUZZLE IN OUR IDEA SHOP AND GOT 1.6 MILLION VIEWS ON YOUTUBE (IN ITS FIRST MONTH).

AND WHEN STUDENT ALYSSA BOWES HELPED CONSTRUCT A DEVICE TO MODEL AN ANTINEUTRINO DETECTOR.

AND WHEN ALUMNA SUSAN SOLOMON DISCOVERED THE CAUSE OF OZONE DEPLETION IN ANTARCTICA.

THEY ALL SAW A CHALLENGE—AND WENT FOR IT.

SO IF YOU’RE WONDERING WHAT KIND OF PEOPLE GO TO ILLINOIS TECH, IT’S PEOPLE LIKE THEM. PEOPLE WHO ARE CURIOUS AND SHARP AND AMBITIOUS AND REBELLIOUS. PEOPLE WITH THE AUDACITY TO DO THINGS BETTER, SMARTER, AND FASTER. PEOPLE WHO ARE READY TO LIVE, SEE, DO, BE, AND OWN IT ALL. PEOPLE LIKE YOU.

AND THERE ARE OTHER RANKINGS THAT MATTER:

WE’RE #1 IN ILLINOIS AND #75 IN THE U.S. FOR MID-CAREER EARNINGS OF GRADUATES WHO HAVE RECEIVED A BACHELOR’S DEGREE (PAYSCALE COLLEGE RETURN ON INVESTMENT REPORT 2017).

ILLINOIS TECH IS CONSISTENTLY NAMED AS AN EDUCATIONAL “BEST VALUE” BY U.S. NEWS & WORLD REPORT, THE PRINCETON REVIEW, AND FISKE GUIDE TO COLLEGES.

OUR HOMETOWN OF CHICAGO IS RANKED AS ONE OF THE TOP 10 CITIES FOR TECHNOLOGY CAREERS BY CIO.

ILLINOIS TECH IS #1 IN ILLINOIS FOR THE HIGHEST UPWARD MOBILITY OF GRADUATES FROM LOW-INCOME HOUSEHOLDS. WE ARE #2 IN THE COUNTRY AMONG “HIGHLY SELECTIVE PRIVATE COLLEGES” IN INTERGENERATIONAL MOBILITY (EQUALITY OF OPPORTUNITY PROJECT).
LIVE IT
OUR CAMPUS

Even though you have Chicago as your playground, there’s so much to do on Illinois Tech’s 120-acre campus, too! You can check out a comedian, go bowling, or play video games in The Bog. Attend a talk by a visiting architect. Get your hands dirty in our urban farm and play flag football in the Quad. Swim some laps in Keating and play tennis on our courts. Grab a coffee and squeeze in some ping-pong in the MTCC (while you’re there check out what’s spinning on WIIT, the university’s student-run radio station).

Are you interested in...

- Dance
- Comic books
- Quidditch
- Theater
- Social gaming
- Robotics
- Colleges Against Cancer
- Engineers Without Borders
- Magic
- Music
- Student government
- Volunteering
- Urban farming
- Skiing and snowboarding

...or one of any other tons of activities?
You can do it here.
And at Illinois Tech you can even start your own student group!

Learn more: iit.edu/campus-life

A STYLE ALL OUR OWN

Forbes magazine called Mies Campus one of “America’s most beautiful college campuses.”

GAME ON

Love sports? We’re proud of our legacy of excellent student-athletes. At Illinois Tech you’ll get time on the court and in the field—and still get a world-class education.

If recreation and fitness are more your speed, or you just like to stay active, you can get moving at everything from cricket and yoga to dodge ball and martial arts ... even a color run!

Not an athlete at all (but still love to watch sports)? At Illinois Tech we have plenty of room in our Hawk’s Nest. Join the fan club and you can get in the game, too.

Men’s: Baseball, Basketball, Cross Country, Lacrosse (2018–19), Soccer, Swimming and Diving, Tennis, Track and Field, Volleyball
Women’s: Basketball, Cross Country, Lacrosse, Soccer, Swimming and Diving, Tennis, Track and Field, Volleyball

Want to be a Scarlet Hawk? Visit www.illinoistechathletics.com and click the Recruits tab to complete a Recruit Me Form for the sport you are interested in playing.
LIVE IT
COOL DIGS AND MILLION $ VIEWS

Our residence halls have some pretty killer features and skyline views. Illinois Tech’s State Street Village was named one of the “coolest dorms in the nation” by U.S. News & World Report. You’ll find built-in friendships. Your space—and your room to grow. Quiet places when you need it, and places to kick back when it’s time to unwind. Meet people. Study. Have a late-night debate in the lounge. Round up a group for a pick-up game. This is what college is all about.

And the amenities? Our residence halls are totally wired. And they’ve got cable, laundry, and fitness rooms, plus all the furnishings you need and 24/7 security. You’re steps from classes, the dining halls, outdoor spaces, and the train.

SMASHING PUMPKINS—OUR VARIETY OF CAMPUS TRADITION

For 13 years Illinois Tech’s annual Pumpkin Launch has tested the engineering prowess of student teams who design trebuchets, catapults—you name it—to see whose contraption can hurl a pumpkin the farthest.

GONE GEEK OR GONE GREEK?

All Illinois Tech you can do both. Our six fraternities and three sororities emphasize academics, community service, and leadership. You’ll be a part of a supportive community where at the end of the day tech rules. You can study hard, have fun, be a leader, and be your own individual.

DID SOMEBODY SAY TACOS?

You won’t go hungry here—and our popular Taco Thursdays are only the beginning. Do pizza one day or go vegan the next. We’ve got your diet and cravings covered—and we’ve even got a student advisory group just for food. Plus, Chicago is one of the world’s great food cities, with every type of cuisine imaginable. Dine on campus or visit an ethnic restaurant in the city.

JOIN THE GREEN REVOLUTION

Sustainability is important to us. Illinois Tech has solar panels on several buildings, a complex recycling and composting program, and a sustainability action plan that is addressing everything from campus vehicle emissions to stormwater use. It’s a commitment that we take seriously—and a big reason why Princeton Review named us among the greenest universities in the country.

Plus our entire Mies Campus—including our first-in-Chicago research-based advanced wind turbine—is part of the Illinois Tech Microgrid, the country’s first functional smart microgrid.

FIND YOUR DREAM JOB

Illinois Tech’s Career Services offers a wide range of services designed to help you gain professional experience in your field—from internships to co-ops to jobs. Our career coaches help with résumé and cover letter review, interview prep, your job search, and more.

JUST HANG OUT

Illinois Tech students have a lot going on. When their brains hit the limit it’s time to unwind at two of the university’s main student hangouts.

The McCormick Tribune Campus Center was named among the “most amazing campus student unions” in the country (Best College Reviews). Apart from its awesome design (a Chicago “L” train runs through a 530-foot tube on top of it), the MTCC houses a coffee shop and convenience store, ping-pong tables, a full-service restaurant, lounges, foosball, and an outdoor beach volleyball court.

The Bog is all about entertainment—from a bowling alley to video games to a live performance venue. You can play pool, attend a spa night, hear a local band or comedian, or go dancing—and The Bog’s waffle fries are pretty legendary, too.

SHARE YOUR VOICE

Since 1928, Illinois Tech students have informed and entertained the campus with TechNews, the student newspaper. Report on university news, review a new album, or write an op-ed piece. Or host a show on WIIT, one of the country’s oldest, continually operating student-run radio stations.

GRAB YOUR TRUMPET

On violin. Or clarinet. Illinois Tech’s campus is also home to VanderCook College of Music, a highly renowned music school. All Illinois Tech students can take classes at VanderCook. So bring your instrument and keep playing!
SEE IT

CHICAGO—AND THE WORLD

YOUR CITY

Chicago is a go-anywhere, do-anything global city. Go to a game—Blackhawks, Bears, Cubs, Fire, Sky, White Sox. Visit one of the world’s best museums. Get lost in world-renowned architecture. Dine at a five-star restaurant or chow down at a hole-in-the-wall. Go to a Broadway play, or go see your favorite band in concert. You can do it all—and it’s all just minutes from Mies Campus.

YOUR NEIGHBORHOOD

Illinois Tech’s surrounding Bronzeville and Bridgeport neighborhoods have tons of history and just as much personality. You can check out an edgy art gallery, eat at an old-school soul food restaurant or Italian café, or ride your bike along the lakefront, less than one mile from campus. The cool stores and restaurants of bustling Chinatown, Pilsen, and South Loop are nearby, too. Diversity is right outside your door.

YOUR WORLD

Step and talk to someone walking across Illinois Tech’s campus and chances are you’ll get a mini geography lesson. Our students come from the coasts of Saint Lucia, the mountains of Vietnam, and the cities of Brazil. We have a multinational student body with students from 100 countries and 49 states. And you can get out there and see it firsthand, too. Illinois Tech offers study abroad program options on six continents for every major, along with internship and volunteer opportunities.

GET OUT AND GET AROUND

Every Illinois Tech undergrad receives a Ventra U-Pass, which gives you unlimited access to CTA public transportation citywide. Take the “L” downtown. Catch a bus to go shopping. Or explore one of Chicago’s seemingly endless number of neighborhoods, each with its own unique personality and attractions. Your U-Pass will get you there. As an added bonus for our students, Illinois Tech offers a free shuttle bus service from Mies Campus to Downtown Campus and two downtown Metra train stations.

Want to create your own route? Hop on a Divvy bike share at one of the on-campus bike stations, and cruise anywhere you like.
DO IT
STUDY AND RESEARCH

Academic Programs with a Technology Focus

At Illinois Tech our students describe our programs as challenging, focused, and demanding—and employers say they hire our graduates because they can “hit the ground running.” What makes our undergraduate education different is a focus on emerging technologies and our interdisciplinary, collaborative programs. When we say we’re different, we mean it.

Gaby Sumampouw (Chemical Engineering ‘15), from Indonesia, researched how to offset fossil fuels use by creating biofuels from algae. It’s just one of the many opportunities on campus that engage undergraduates in research with real-world applications.

RESEARCH YES, EVEN AS AN UNDERGRAD!

Is there a topic that really drives you?

Illinois Tech connects undergrads with research opportunities. You’ll find opportunities through Illinois Tech’s research affiliates, including Argonne National Lab and FermiLab, plus companies on campus at University Technology Park and throughout Chicago. Many of our faculty are experts in their fields and offer a direct line to research opportunities in the greater Chicago area and beyond. There are even programs that provide undergraduates stipends for research.

MEET A FEW OF OUR ROCK STARS

YOU’LL BE LEARNING FROM THEM!

Matthew Spenko
Associate Professor of Mechanical Engineering
B.S. Northwestern University,
M.S. and Ph.D. Massachusetts Institute
of Technology
Director, IT Robotics Lab

Designs mobile hybrid robots that go where other robots can’t (for his robot’s gecko-like gripper, that may include outer space to clean up space debris)

Carly Kocurek
Assistant Professor of Digital Humanities and Media Studies
B.A. Rice University, M.A. and Ph.D. University of Texas at Austin

A cultural historian and authority on video gaming and new media technologies, authored a book about the factors that contributed to the widespread view of video gaming as an enclave for young men and boys

Carlo Segre
DuChesnay Leadership Professor, Professor of Physics
B.S. University of Illinois at Urbana-Champaign,
Ph.D. University of California, San Diego

Range of projects includes nanoelectric devices for innovative batteries, crystal optic devices for delivery and detection of X-rays at synchrotron beamlines, and the Chicago-area bridge building competition for high school students

Weslynne Ashton
Assistant Professor of Environmental Management and Sustainability
B.S. Massachusetts Institute of Technology,
M.S. and Ph.D. Yale University

Led a three-year multinational effort to promote and facilitate cleaner production and sustainable industrial development throughout the Americas

95% of our full-time instructional faculty members hold a doctorate or terminal degree
Who doesn’t want to be a superhero? At Illinois Tech our students are super-humans in training—real people using real superpowers to change the world for the better.

Students like Tyler Grudowski (Mechanical Engineering 4th year), from Orland Park, Illinois, whose IPRO class designed a supinating arm for a robotic standing wheelchair designed by fellow students. His team’s goal was to provide increased mobility for people who have a disability but don’t need to be confined to a wheelchair.

“The majority of students come to Illinois Tech to get a great education because they want to make a positive impact on people’s lives,” Tyler says.

So yes. Magical hammers and force fields are cool—but we’ll take a world-class STEM education any day.

**IPRO Program**

One of Illinois Tech’s bragging rights is our signature Interprofessional Projects (IPRO) Program. We started it in 1995, and it’s still one of only a few programs like it in the country. In IPRO you’ll work with other students from various majors to develop a solution to a real-world problem. If you’re already thinking about your post-college career, you’ll have a leg up—employers tell us they hire grads with the same teamwork and leadership skills that Illinois Tech students learn in IPRO.

Recent IPRO student teams have:

- Developed a prototype desalination device for the Sahara
- Built sustainable water distribution systems in Haiti
- Started a “smart recycling” system on campus
- Developed renovations for a historic neighborhood theater
- Reimagined the failed 1940s Antarctic Snow Cruiser
- Developed an assistive device to help visually impaired people swim
- Designed a mobile operating room for disaster relief in developing countries
The Idea Shop is where you can transform your ideas into reality. This 13,000-square-foot innovation hub has serious tools: a state-of-the-art, rapid-prototyping lab featuring 3-D printers and a 3-D scanner, multiple CNC milling machines, a vacuum former, and laser cutter. It’s one-part entrepreneurial center and one-part gathering place, with full-time staff dedicated to helping you test the limits of your imagination.

Illinois Tech also has a Machine Shop on campus where you can fabricate and design pretty much anything for a class, do metalworking projects, and use a precision-cutting machine.

DO IT
ASK “WHAT IF?”
AND SHOUT “WHY NOT!”
YOU CAN BUILD IT IN THE IDEA SHOP

X-CUBE MARKS THE SPOT

“When I found out that there was a place at Illinois Tech entirely devoted to creation, I was blown away.”
— Dane Christianson (Mechanical Engineering ’15), from Batavia, Illinois, who built the 52 moving parts of his X-Cube twisty puzzle using 3-D printers in the Idea Shop during his sophomore year at Illinois Tech. The X-Cube is now sold at Marbles and Barnes & Noble.

IUFarmIIT

Illinois Tech’s on-campus urban farm, IUFarmIIT, is a test bed for sustainable urban farming. Previously the focus of an Interprofessional Projects (IPRO) Program course and a landscape architecture elective, IUFarmIIT is now a project of Engineers for a Sustainable World. Students in ESW are working in collaboration with Illinois Tech’s Wanger Institute for Sustainable Energy Research to develop a completely automated, remotely controlled farm that uses renewable energy, creates no waste, minimizes water consumption, and provides safe and reliable food products.
Think this building by the world-renowned architect (and current Illinois Tech professor) John Ronan is cool? This will be one of your classrooms one day. Our new Ed Kaplan Family Institute for Innovation and Tech Entrepreneurship will also house the rapid-prototyping Idea Shop, the IPRO Program, and work spaces where your entrepreneurial endeavors can incubate and flourish. It will be a hub for creativity and exploration on campus.

*Into architecture? The Innovation Center will be a living laboratory for cutting-edge design. Its first-in-Chicago dynamic façade of ETFE (ethylene tetrafluoroethylene) foil cushions will vary the amount of solar energy entering the building through sophisticated pneumatics and give the building a light, cloud-like appearance.

Leadership Academy

There are many different types of leader. Whichever category you fall into, the M. A. and Lila Self Leadership Academy teaches you to thrive as a team player and leader—and to inspire excellence in others. The Leadership Academy provides mentorship, coaching, and extensive programming for students, preparing them to become leaders in their professions and the community. The program is open to all students, and the Leadership Academy extends its training throughout your enrollment at Illinois Tech.

Just a few of the academy offerings available to all Illinois Tech students include:
- Seminars: A series of five intensive seminars is offered each academic year.
- Leadership Retreat: Free for Illinois Tech students, the retreat (above) is aimed at developing leadership skills, teamwork, and a strong sense of community.
- Certificate in Leadership Studies: Obtain a certificate by completing 40 hours of academy-sponsored events.

Entrepreneurship Academy

Our name may be Illinois Tech, but you could also call us Illinois Institute of Entrepreneurship given the number of our students who are working to make their business ideas a reality. The Entrepreneurship Academy offers a range of robust programs to propel students toward business success—from connecting students to degree programs to providing access to business incubators and accelerators, professional guidance, and entrepreneurship clubs. The academy also oversees fellow programs that provide students the training to succeed as entrepreneurs as well as programs that empower our faculty to enhance entrepreneurship initiatives across campus.

DO IT

ETHYLENE TETRAFLUOROETHYLENE IS THE NEW BLACK*
DO IT
MORE MATHLETE THAN ATHLETE?

Perhaps your idea of a sporting event is building a robot that will totally crush the competition (literally and figuratively). Illinois Tech’s student academic-oriented groups and special programs offer something for aspiring architects, entrepreneurs, inventors—you name it.

• Design a quadcopter in Illinois Tech Robotics or join the IIT Robotics Lab
• Test your Capture the Flag skills in HackIIT
• Develop ways to hide covert files in an MP3 in the Cyber Forensics and Security Lab
• Pitch your idea for a cool new gadget in IIT CEO
• Research a building while studying abroad in the IIT Berlin++Summer Program
• Form your own group and design a chainless, fluid-powered bicycle for a national competition

In spring 2016, students in professors Frank Flury and Colleen Humer’s Design/Build studio developed a community center; during the summer, in combination with local community members in Chile, they constructed the center on the Laguna of Antihuala, Chile. Students in the program have also completed projects in Indonesia, Ghana, and most recently, Japan.

ELECTRIC VEHICLE DEVELOPED BY ILLINOIS TECH STUDENTS

Students in the IIT Motorsports clubs designed and built an electric vehicle that won the 2015 Fiat Chrysler Automobiles Innovation Award at the Formula Hybrid Competition. Below are a few ideas that made their WISER Tomahawk innovative.

If you’re an aspiring entrepreneur with diverse interests, look no further than Sunny Shah (Psychological Science 4th year) for a healthy dose of inspiration.

“Studying psychological science allows me to understand human behavior and the nuances of our world at large,” says Sunny, a budding app developer from Woodridge, Illinois.

Sunny’s Circle Up app, which calculates the best meet-up location for a group of people, was a finalist in the Big Idea Technology competition. His latest endeavor, EcoEats, was a semi-finalist at the U.Pitch competition, where he competed against the country’s top collegiate entrepreneurs—even pitching his idea to one of the co-stars of ABC’s Shark Tank.

“Knowing the principles of business is a vehicle toward success, but understanding the values you want to instill in your business—and the human impact you want to create—is more important,” Sunny says.

In addition to developing high-impact apps, Sunny helps fellow students to pursue their own big ideas as president of Illinois Tech’s chapter of Collegiate Entrepreneurs’ Organization (CEO).
BE IT

HANG WITH THE SMART KIDS

AT ILLINOIS TECH YOU CAN BE ANYTHING—MORE IMPORTANTLY, YOU CAN BE YOURSELF.
NERD OUT ON POLYMERS. DIVE INTO EXASCALE COMPUTING. STUDY THE NATIONALIST MOVEMENTS IN LATIN AMERICA. OR STUDY ALL OF THEM. BE WHOEVER YOU WANT TO BE.

OUR RECENT GRADS WERE ONCE JUST LIKE YOU—FINDING THEIR WAY AND EXPLORING THEIR DREAMS. ILLINOIS TECH HELPED THEM GET THERE. MEET THE NEXT GENERATION OF GREAT INNOVATORS AND ENTREPRENEURS—AND PREPARE TO JOIN THEM.

Katherine Darnstadt (Architecture ’05) solves architectural problems in breakthrough ways. When the firm that she founded was asked to address a South Side Chicago food desert, she designed a bus—not a building—to provide the best solution.

After acquiring an old Chicago Transit Authority bus and poring over its manual, her firm converted it into Fresh Moves, a mobile grocery store packed with produce. Fresh Moves Mobile Markets are now part of a City of Chicago initiative providing affordable fresh fruits and vegetables to underserved areas on the city’s south and west sides.

“Being part of the architecture profession, and the alumni and professors gave me the support and strength to challenge what the profession will be in the future,” Katherine says.

Emmanuel Klu (Computer Science ’13) asked his parents for permission to leave their home in Ghana and travel to the United States to attend Illinois Tech, none of them likely anticipated the miles Emmanuel would log elsewhere throughout the world. An intrepid backpacker, he has visited 21 states and six European countries. Emmanuel concluded this latest trip by jumping into a journey of a different type—his new role as a software engineer with the corporate engineering team at Google in Mountain View, California.

“I believe that it gives me the chance to contribute directly to innovation at Google, and at a very fast pace,” Emmanuel says.

Nishanth Samala (Computer Science ’14) was asked by his parents for permission to leave his home in India and travel to the United States to attend Illinois Tech. None of them likely anticipated the miles Nishanth would log elsewhere throughout the world. An intrepid backpacker, he has visited 21 states and six European countries. Nishanth concludes this latest trip by jumping into a journey of a different type—his new role as a software engineer with the corporate engineering team at Google in Mountain View, California.

“With a career, you have to be willing to take risks,” Nishanth says. “In India, I was taking an extreme risk, and the only way to find out if you’re ready for that kind of risk is to jump in and do it.”

Nishanth developed Strados, a machine-learning platform that predicts car health. The Strados app translates raw computer signals from a car into relatable emotions and text. When connected with a maintenance provider, this data can be used to preempt issues and save drivers money.

“Working on this project has been my passion,” Nishanth says. “It’s been a great experience for me to work on something that I’m passionate about, and I’ve learned so much from it.”

AFTER ILLINOIS TECH

Where are Illinois Tech students headed after they graduate? Big companies, multinational conglomerates, and Fortune 100 companies. Startups and nonprofits, too. Many of them are launching their own companies or attending graduate school. Just a few examples of companies that have hired our recent graduates include:

• ComEd
• eBay
• GE Healthcare
• Goldman Sachs
• JPMorgan Chase
• Lockheed Martin
• Microsoft
• SpaceX
• Studio Gang
• Wolfram
OWN IT
INNOVATION BEGINS HERE

ILLINOIS TECH ALUMNI INNOVATORS
KNOW OUR CHANGE-MAKERS

When you graduate you’ll join all of them around the world in the get-ahead-and-do-big-things club. And when we say around the world, we mean all 3,959 miles of it: Our alumni are in more than 128 countries and all 50 states.

ED KAPLAN
(MECHANICAL ENGINEERING ’65)
PIONEER IN BARCODE TECHNOLOGY

JOHN P. CALAMOS SR.
(ECONOMICS ’63, M.B.A. ’70)
FOUNDER, CHAIRMAN, CEO, AND CO-CHIEF INVESTMENT OFFICER OF CALAMOS INVESTMENT MANAGEMENT

GLORIA RAY KARLMARK
(CHEMISTRY, MATHEMATICS ’65)
PART OF THE LITTLE ROCK NINE, WHO STOOD UP AGAINST SEGREGATION IN ARKANSAS SCHOOLS

HARMONY CLAVER-SALVERS
(COMPUTER SCIENCE, COMPUTER ENGINEERING ’12)
INVENTOR OF USAA BANK’S VOICE GUIDED DEPOSIT, WHICH ALLOWS VISUALLY IMPAIRED VETERANS TO DEPOSIT CHECKS VIA SMART PHONES AND TABLETS

WHAT LEGACY WILL YOU LEAVE?

CHARLES PIERCE
(Chemical Engineering 1901)
The country’s first-known African-American degree-holding chemical engineer

FLORENCE KNOLL BASSETT
(Architecture ’41)
Co-founder of Knoll, considered a pioneer of modern workplace and residential design

RAJEEL CHANDRAEKAR
(M.S. Computer Science ’98)
Part of the team that developed the Pentium chip

ANITA BURKE
(Mechanical Engineering ’90)
Chief Engineer for the GMC Grand Canyon and Chevrolet Colorado

JASON TENENBAUM
(Aerospace Engineering ’07)
Engineer for SpaceX who worked on the Dragon spacecraft

Harmony Clauer-Salvers
(Computer Science, Computer Engineering ’12)
Inventor of USAA Bank’s Voice Guided Deposit, which allows visually impaired veterans to deposit checks via smart phones and tablets

Robin Chaurasiya
(Psychology ’06)
Finalist for the 2016 Global Teacher Prize

James Roche
(English ’60)
Twentieth Secretary of the United States Air Force

John P. Calamos Sr.
(Economics ’63, M.B.A. ’70)
Founder, Chairman, CEO, and Co-Chief Investment Officer of Calamos Asset Management

Gloria Ray Karlmark
(Chemistry, Mathematics ’65)
Part of the Little Rock Nine, who stood up against segregation in Arkansas schools

Harmony Clauer-Salvers
(Computer Science, Computer Engineering ’12)
Inventor of USAA Bank’s Voice Guided Deposit, which allows visually impaired veterans to deposit checks via smart phones and tablets

Illinois Tech offers undergraduate programs in the following colleges and schools:

In addition to the undergraduate programs offered by each of these six colleges, students may go on to attend graduate school in any of these same colleges, or in one of Illinois Tech’s two other colleges: Chicago-Kent College of Law and the Institute of Design.

**Academic Minors**
You can broaden your skills and pursue your other academic interests with a minor in one of a number of areas of study. Just a few examples of academic minors include:

- Artificial Intelligence
- Cyber Security Foundations
- Information Architecture
- Game Studies and Design
- Internet Application Development
- Entrepreneurship
- Human Resources
- Public Administration
- Military/Naval Science
- Environmental Engineering
- Engineering Graphics and CAD
- Rehabilitation Services
- Leadership
- Literature
- History
- Music
- Urban Studies ... and many more!

**Double Down: Your Ultimate Academic Twofer**
Illinois Tech offers a special program that allows you to complete both your bachelor’s and master’s degrees in as few as five years. And you get to keep your undergraduate scholarships in your fifth year! Examples include:

- B.S. in Applied Mathematics/M.S. in Data Science
- B.S. in Information Technology and Management/M.S. in Cyber Forensics and Security
- B.S. in Physics/M.S. in Health Physics
- B.S. in Biochemistry/M.S. in Food Safety and Technology
- B.S. in Social and Economic Development Policy/Master of Public Administration
- B.S. in Civil Engineering/M.S. in Environmental Engineering
- B.S. in Business Administration/M.S. in Finance (ranked #5 in the U.S.)
- And over 50 more!

It’s focused, highly specialized, saves you money—and you can earn your second degree in one of more than 50 areas.

**Combined Undergraduate/Graduate Law Programs (leading to B.S./J.D. degrees)**
Low school classes are taken at Illinois Tech’s Chicago-Kent College of Law. Students have access to pre-law advising and LSAT preparation assistance.

For more about majors, minors, and academic programs in between, visit admissions.iit.edu/undergraduate/programs

---

We get it. We really do. If you have a lot of ideas about what you want your major to be, it’s OK. You’re not alone. If you choose to come to Illinois Tech as undecided, you can delay your selection of a major until your sophomore year.

Choose from Undecided Engineering, Undecided Science, or General Undecided (business, applied technology, communication, humanities, psychology) to get started. You’ll take courses in every department—and along the way you’ll find the path that’s right for you.

And you have alternatives if you realize that your major really isn’t right for you. Changing to any of our 40 majors simply requires a conversation with your academic counselor.
College of Architecture

The College of Architecture teaches students how to see architecture through a different lens—and how to become self-constructors who glean knowledge from the world around them.

Our B.Arch curriculum is centered on a studio sequence of increasing complexity. You'll study topics from the basic building elements to the complex city itself. In addition to design, the courses include architectural history and theory, building technologies, structures, design communication, and professional practice as well as hands-on experience with architecture, economy, creativity, and design with engineering, research, and practice. You'll get the chance to work on projects that are normally open only to graduate students and to apply what you've learned in the classroom to complex problems facing today's global society.

Distinctive Programs: IIT Engineering Thematics and Armour R&D

We enhance our classroom experiences with "extra" through our IIT Engineering Thematics program, such as lecture series, forums, interactive problem-solving exercises, professional site exploration, and team-intensive engineering projects that focus on water, health, energy, and security. Our automated IIT Engineering Thematics Portfolio will help you build a personal online portfolio of your work.

The Armour R&D program allows you to take part in fundamental and applied research projects that address global challenges under the direct guidance of faculty mentors. The year-round sponsored program aims to give select students an experience of hands-on research and development, specifically the implementation of technology based on research findings.

Undergraduate Programs Bachelor of Science (B.S.) Degrees in:

- Aerospace Engineering
- Architectural Engineering
- Biomedical Engineering (Cell and Tissue Engineering, Medical Imaging, or Neuroengineering)
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- Materials Science and Engineering
- Mechanical Engineering
- Dual Degrees (B.S.) in both Electrical Engineering and Computer Engineering
- Engineering Graphics and CAD Curriculum (Certificale)
- Engineering Management
- Sustainability

Undergraduate Programs Bachelor of Architecture (B.Arch.)

Our Cloud Studio program allows B.Arch. graduates to apply fifth-year studies toward the M.S. in Architecture or the Ph.D. in Architecture.

Bachelor of Architecture (B.Arch.)/Master of Science in Architecture (M.S. ARCH)
The co-terminal B.Arch./M.S. in Architecture degree program is designed to prepare students for doctoral studies or professional careers. Students who complete the program will be allowed to continue their studies toward our Ph.D. in Architecture degree, including credit transfer of up to 3 2 credit hours.

Rigor and relevance. These two words describe the educational experience you can expect from the College of Science. Our programs are firmly grounded in the fundamentals of mathematics, science, and technology, and understood within their application to the outside world. They are challenging and academically demanding. And that’s what you should expect from a college that prides itself on making sure its students are prepared to make a difference in the world—not only on day one, but also 25 years after they graduate.

You’ll find all of the benefits of a small, private school coupled with the research capacity of a major league institution. We offer you the chance to work on research projects of the beginning of your academic career on campus and at national laboratories including Argonne and Fermilab. Cancer therapies, big data and analytics, nanomaterials, discrete applied mathematics, cloud computing, particle physics, superconductivity—these are just some of the areas where you can find yourself working alongside faculty and graduate students.

Distinctive Program: Undergraduate Research Stipends

We offer a number of $5,000 College of Science Undergraduate Summer Research Stipends so that select college undergraduates can conduct research for 10 weeks during the summer. This financial support allows students to participate in research work between school terms and to catalyze their scholarly activities and productivity.

Undergraduate Programs Bachelor of Science (B.S.) Degrees in:

- Applied Mathematics
- Applied Physics
- Astrophysics
- Biochemistry
- Bioinformatics
- Biology
- Biomedical Science
- Chemical Engineering
- Chemical and Biomolecular Engineering
- Computer Science
- Earth Science
- Environmental Science
- Forensic Science
- Biotechnology
- Medical Science
- Microbiology
- Molecular Biology
- Biophysics
- Physics

Undergraduate Programs Bachelor of Science (B.S.) Degrees in:

- Applied Analytics
- Behavioral Health and Wellness
- Biological/Behavioral Science
- Bioinformatics
- Biochemistry
- Bioanalytical Chemistry
- Applied Physics
- Applied Mathematics
- Computer Science
- Electrical Engineering
- Materials Science and Engineering
- Mechanical Engineering
- Chemical Engineering
- Environmental Science
- Forensic Science
- Biotechnology
- Medical Science
- Microbiology
- Molecular Biology
- Biophysics
- Physics

"I studied abroad through the IIE’s Global Gap Year Travel Program. We went to Switzerland, Italy, France, and Germany. Some was definitely the best decision I’ve ever made. I can’t believe I actually got to see Switzerland and see the Alps in person. I was able to see the architecture of the cities and visit the Eiffel Tower. I was able to travel to France and see the beautiful landscapes and architecture. It was truly an experience of a lifetime.“ — AMBER HINCH CLAREMONT, 5TH YEAR, FRESHMAN, ILLINOIS TECH

"In my introduction to the profession class, we were assigned to interview a professor from the chemistry department to learn more about their research as a result of one such interview I became interested in the work of one of my professors and was invited to take an introductory research class in the laboratory during the summer. Seeing laboratory experience really broadened my idea of what chemistry as a career and helped me see what I was getting myself into after graduation."

GRACE WISCHMeyer, CHEMISTRY, 3RD YEAR, FRESHMAN, ILLINOIS TECH

"I attended IIT seminars on research projects that was a great opportunity for me. It helped me understand more about how research process works. It helped me connect to people who are doing research now and learn about the research process."

JAY KIM, DIGITAL HUMANITIES, 4TH YEAR, FRESHMAN, ILLINOIS TECH

"I advise students to consider a career as a health professional. It’s a very hands-on career and it’s something that will definitely help you develop skills and make an impact."

KAREN HARRIS, MEDICAL SCIENCE, 2ND YEAR, FRESHMAN, ILLINOIS TECH

"I studied abroad through the IIE’s Global Gap Year Travel Program. We went to Switzerland, Italy, France, and Germany. Some was definitely the best decision I’ve ever made. I can’t believe I actually got to see Switzerland and see the Alps in person. I was able to see the architecture of the cities and visit the Eiffel Tower. I was able to travel to France and see the beautiful landscapes and architecture. It was truly an experience of a lifetime."
School of Applied Technology

The School of Applied Technology combines a hands-on, industry-based, project-focused approach with an understanding of how management principles apply to technology. You'll learn the skills of management, development, technology and theory, operations, and security—and the professional skills to be a corporate innovator and tech entrepreneur.

**Distinctive Program: Project-Based Learning**

Industry-sponsored projects provide you with opportunities to work in group situations and to produce portfolios of your work. Faculty with significant industry experience will teach your classes and help guide your professional development. You'll make presentations both in class and at professional conferences, and document your projects in academic publications. Like other SAT graduates, you'll be able to demonstrate what you have accomplished—and not just what you have learned.

Recent student projects have addressed:
- Providing 911 operators the indoor location of people making emergency calls on mobile phones
- Creating a 5G-based telecommunication service for the Illinois Tech community
- Visualizing clothing and clothing-brand proximity sensors for the visually impaired
- Cybersecurity, steganography, and security

**Undergraduate Programs**

Bachelor of Information Technology and Management

Bachelor of Industrial Technology and Management

**Option to complete a graduate degree simultaneously with your undergraduate degree**

**Specializations**

- **Data Management**
- **Systems Security**
- **Software Development**

**B.S. in Information Technology and Management (B.S.)**

- **Business Administration**
- **Computer Science**
- **Information Technology**
- **Life Sciences**
- **System Administration**
- **Networking and Communications**

**B.S. in Management (M.S.A.)**

- **Business Administration**
- **Computer Science**
- **Information Technology**
- **Life Sciences**
- **System Administration**
- **Networking and Communications**

Stuart School of Business

Illinois Tech's Stuart School of Business is the business school of choice for those who expect more than just a typical degree in business administration. It's a new type of business education for those who want to be leaders in the next economy—and in a world where technology is the foundation of innovation. This degree translates into a real career advantage, preparing you with the skills needed to make a meaningful impact on an organization's success.

Our programs emphasize analytics and quantitative methodologies, hands-on learning, and real-world problem solving. You’ll learn to collaborate with—and lead—interdisciplinary teams by working on highly innovative, technology-driven projects.

**Distinctive Program: Entrepreneurship**

Stuart classes focus on a leadership in entrepreneurship and innovation, and feature numerous opportunities to work on projects for real clients in the Chicago area. Outside of the classroom, a variety of entrepreneurial and financial student competitions allow you to apply your skills and gain recognition from your peers and future employers.

**Undergraduate Programs**

- Bachelor of Science in Business Administration (B.S.)
- B.S. Master of Public Administration (M.P.A.)

**Specializations for Business Majors**

- Applied Mathematics
- Architecture
- Construction Management
- Environmental Management
- Finance
- Human Resource Management

**Minors for Non-Business Majors**

- Minor in Business
- Minor in Economics

Stuart’s finance program is ranked 9th in the U.S. and 42nd globally by the Financial Times (2017).

**Finding the Right Fit for You - Computer Engineering, Computer Science, or Information Technology**

**Your First Choice:** Computer, coding, the industry—what makes it all tick. You know you want to work in this field, you’re not just sure which major is best for you.

All Illinois Tech’s and you’ll find the right path. Here are three academic majors that students often choose between, and a bit about each degree program.

**Computer Engineering**

Are you drawn to the electrical and hardware components of computing? If yes, then computer engineering may be the way to go. You’ll study everything from microprocessors to embedded computing devices to laptop and desktop systems to supercomputers. You will work on how data is communicated among electronic components, how software is written for specific hardware platforms, and how microprocessors are designed and optimized from an electrical engineering viewpoint.

**Computer Science**

Our computer science program emphasizes software engineering throughout the curriculum, which gives our students an advantage in the most challenging CS projects. That, along with a thorough computer science theory sequence, will provide you with the basis for fundamental technological innovation. In the long term, this will be a difference maker in your career. Illinois Tech is also growing our computer science faculty in the hottest research areas—including cloud computing, cybersecurity, social networking, and data science.

**Information Technology and Management**

This major is about building and managing IT—and translating it into a useful business tool. Our ITM program integrates theoretical principles with applied, hands-on project and collaboration work. You’ll learn about a variety of IT fields, including web and application development, system architecture, networking, database systems, security, system contemporary programming languages, and more.

**B.S./M.S. in Information Technology**

- Data Management
- IT Entrepreneurship and Management
- Networking and Communications
- Software Development

**Not sure if any of these are right for you?**

Illinois Tech's many technical programs— including computer science, electrical engineering, mechanical engineering, applied analytics, and business with a tech specialization—our admission counselors can walk you through the options, and we can connect you with professors in a given major who can provide you more details.

B.S./D.O./D.O./M.D./Pharm.D. Programs

In addition to pre-medical studies, Illinois Tech offers several dual-degree programs that provide pathways to a medical career.

- Illinois Tech/Midwestern University Chicago College of Osteopathic Medicine (B.S./D.O.)
- Illinois Tech/Bloomington College of Osteopathic Medicine (B.S./O.D.)
- Illinois Tech/Midwestern University Chicago College of Pharmacy (B.S./Pharm.D.)
- Illinois Tech/Vanderbilt University College of Medicine (B.S./M.D./Pharm.D., or B.S./M.D./M.S.)

Students earn a baccalaureate degree from Illinois Tech and a degree from the osteopathic, optometry, dentistry, or pharmacy school.

Biology/Psychological Science Double Major

- B.S. in Biology (B.S. in Psychological Science)

Each degree two dimensions to the challenging program geared toward pre-health students. You’ll differentiate yourself when applying to medical school; programs in public health, genetic counseling, or related areas; or graduate programs whose biology and psychology intersect (e.g., neuroscience, brain science, and cognitive science).

Pre-Health Programs

At Illinois Tech, science, engineering, and technology are in our DNA. If you’re interested in going to medical school one day, our pre-med program can give you the best of both worlds—rigorous training and personalized attention, as well as opportunities to prepare for the MCAT.

We offer joint programs in medicine that lead to a B.S. degree from Illinois Tech and either a D.O. or D.O./D.O. degree from Chicago-area schools. You can also apply to our pre-pharmacy program, which allows easy entry into pharmacy school at Midwestern University. We also offer joint programs in medicine, dentistry, and pharmacy with Lake Erie College of Osteopathic Medicine. Or you can minor in pre-medical studies, which allows completion of pre-med prerequisites for entrance into medical school and prepares you for your M.D.

Illinois Tech’s Jesi Campus is a minute’s away from some of the country’s best hospitals. Find opportunities for experiences right here in Chicago.

I want to make technology and medical science more useful for others. Positively affecting one person’s life—even the smallest snippet—can go a long way and lead to progress and change.

Pooja Agarwal

Minor in Economics

I had several opportunities this year to give back to the community. Whether working at a hospital or at the Food Bank, my experiences were enriching. I’ve realized that I have a passion for helping others and I plan to pursue a career in medicine. That is the reason I’ve chosen to pursue a pre-med degree from Illinois Tech.

— Emily Newman

Minor in Computer Science

Johns Hopkins University

I have had several opportunities to tour a number of large medical facilities. These visits helped me solidify my decision to pursue a degree in biomedical engineering. I would love to work in the development of medical devices. If I could help make something that could change someone’s life, that would be a dream come true.

— Paula Morelli

Minor in Respiratory Care

University of Illinois Chicago
Important Dates and Deadlines
We recommend submitting your application as early as possible. Our admission counselors are available to guide you through the process and answer any questions you and your family may have. Some dual-degree programs and scholarships have special deadlines (see below).

SPECIAL SCHOLARSHIPS DEADLINES
December 1:
- Camras, Crown, Duchossois, Leadership Academy
- University

DUAL ADMISSION PROGRAMS DEADLINES
December 15:
- B.S./D.O.
February 1:
- B.S./J.D., Pharm.D.
March 1:
- Lake Erie College of Osteopathic Medicine Early Acceptance

ROLLING ADMISSION DEADLINES
FOR FALL 2018 ADMISSION (classes begin August 2018)
May 15:
- Admission deadline for international students living outside the U.S.
August 1:
- Admission deadline for students living in the U.S.

NOTIFICATION PROCESS
Illinois Tech announces decisions beginning in October and within a few weeks of receiving your completed application materials.

Application Requirements and Steps
Illinois Tech is looking for students of high academic caliber who contribute to their communities and have a strong work ethic. In the application, we evaluate your academic standing, extracurricular activities, and community-based leadership involvement. We also like to hear why you think an education at Illinois Tech would help you pursue your academic and career goals and how you could contribute to the Illinois Tech community. Be specific. We want to hear your story!

STEP 1: COMPLETE AN APPLICATION FOR ADMISSION
Applications are available online through the Common Application (apply.commonapp.org).

STEP 2: LETTER OF RECOMMENDATION
Choose a teacher who knows you well and can write about your strengths as a student. One letter is required but up to three are accepted. This can be submitted electronically by the teacher through the Common Application.

STEP 3: HIGH SCHOOL/SECONDARY SCHOOL TRANSCRIPTS
Ask your high school counselor to submit your official high school/secondary school transcripts to the Office of Undergraduate Admission.

STEP 4: TEST SCORES
Send official ACT or SAT scores to the Office of Undergraduate Admission.
Illinois Tech’s ACT code is 1040; the SAT code is 1318.

High School Requirements
Students engaged in a college preparatory or general education curriculum generally make good candidates for Illinois Tech. Specifically, we recommend the following high school courses be completed:

- 4 years of English
- 4 years of mathematics
- 3 years of science (4 for engineering and science majors)
- 2 years of social science

SCHOLARSHIPS

Need-Based Grants
- Awarded to students with need, as determined by the Free Application for Federal Student Aid (FAFSA)
- Many students who do not qualify for federal or state aid will qualify for institutional grants

To help determine your eligibility, please use our net price calculator at www.collegecostcalculator.org/iit.

ILLINOIS TECH FINANCIAL AID PROCESS

Submit FAFSA online
- www.fafsa.ed.gov
- Illinois Tech code: 001691

Early March: Receive a complete award package

We’re #1 in Illinois and #75 in the U.S. for mid-career earnings of graduates who have received a bachelor’s degree (PayScale College Return on Investment Report 2017).

To help determine your eligibility, please use our net price calculator at www.collegecostcalculator.org/iit.

2016-17 freshman FAFSA filers
- Includes state, federal, and institutional monies

IT’S ALL HERE
FINANCING YOUR DEGREE

Think college is expensive?
It’s important to consider not just the cost of your education but also the long-term value. Illinois Tech creates opportunities in the most in-demand fields—and the returns for our graduates in both the workplace and their daily lives are well documented.

If you’re wondering whether you can afford such a great education, perhaps the better question is: Can you afford to pass it up?

More than 98 percent of our students receive some form of financial aid—so we’ve had a lot of practice delivering on our promise to make an Illinois Tech education affordable for you.

Learn more about financial aid: iit.edu/financial-aid

Family’s Adjusted Gross Income  Average Scholarships and Grant Aid
$0–45,000  $41,390 Total Scholarships and Grant
$45,000–85,000  $38,700 Total Scholarships and Grant
$85,000–135,000  $32,900 Total Scholarships and Grant
$135,000 and above  $27,600 Total Scholarships and Grant

2016-17 freshmen FAFSA filers
- Includes state, federal, and institutional monies

SCHOLARSHIP REQUIREMENTS

Special Scholarships
- Illinois Tech’s special scholarships range from full tuition to housing and summer research stipends. Most of these scholarships require an additional application and/or interview.
- Special application required, apply by December 1

Duchossois Leadership Scholars Program
- Elite scholarship program for top students from across the country who have demonstrated exceptional leadership potential and academic success in their projected fields (tuition, room, and board)

Leadership Academy
- Prestigious full-tuition scholarship and experiential leadership program (tuition)
- No additional application needed, apply by December 1

Camras Scholarship Program
- Selective scholarship program for top students, aimed at helping them become excellent researchers, leaders, and community-oriented individuals (tuition)
- Additional application required, awarded on a rolling basis

Chicago Police and Fire Departments Scholarship
- Awarded to children and grandchildren of members of the Chicago Police Department, Chicago Fire Department, and Chicago Paramedic Department ($20,000; application must be submitted with application for admission)

For a complete list of scholarships, visit admissions.iit.edu/undergraduates/finances/scholarships.

ILLINOIS TECH HAS BEEN NAMED AN EDUCATIONAL “BEST VALUE” BY U.S. NEWS & WORLD REPORT, THE PRINCETON REVIEW, AND FISKE GUIDE TO COLLEGES

AFFORDABLE.

All full-time, first-year students are automatically considered for the Heald Scholarship upon application for admission to Illinois Tech. The Heald Scholarship is a merit-based scholarship ranging from $10,000–$25,000.

Tuition
- $44,150
- 2017-18 undergraduate tuition
Room and Board
- $11,840
- On-campus room and board costs vary depending on selection of campus housing and meal plan
Fees
- $1,700
- Costs estimated for housing based on FAFSA housing selection (on-campus, off-campus, with parents)

For more information, visit iit.edu/financial-aid.
PARENTS AND FAMILIES!

We know you’re sifting through mountains of college brochures, too. Illinois Tech welcomes you to learn more about our university—why and how we’re unique. We have created an online forum just for parents, families, and anyone else who wants to know more about connecting a student with Illinois Tech.

BE A PART OF IT

Visit our Undergraduate Admission page for families, with a parent-focused list of resources from deadlines to financial aid to safety.

Monday, October 9, 2017

Women in STEM Day at Illinois Tech provides an opportunity for 9th–12th grade girls to explore their interests through hands-on sessions in the STEM fields. Parents and families may attend.

Get an in-depth look at our academic programs, campus life, and the admission and financial aid processes—and see firsthand what it’s like to be a Scarlet Hawk!

Discover Illinois Tech Days

Discover Illinois Tech for yourself during these open house events with campus tours, academic sessions, and more! Visit us on these upcoming days:

October 14, 2017 • April 28, 2018 • June 23, 2018 • July 21, 2018

24-Hour Hawk Life: Overnight Visits

Spend the night on campus with a current student and immerse yourself in life at Illinois Tech. Check out everything from classrooms to where students go for a late-night bite.

Daily Visits

Pick a day that’s convenient for you to visit with an admission counselor, take a tour, meet our students, hear from our faculty, and just get to know Illinois Tech.

Take a Virtual Tour

Can’t make it to campus—or just can’t wait until you get here in person? Visit us now! Log on to www.iit.edu/#virtualtour to view a cool online virtual tour of our buildings, labs, open spaces, and more!
Our admission ambassadors lead campus tours throughout the year. There’s no better way to get the “low down” about Illinois Tech than to hear it from our own students!

Sign up for a campus visit at visit.iit.edu
